I am out of the office today in a mandatory tactical shooting course. I received the call at 3 pm from patrol officers. Took me only 15 min to be on site. I activated our city contractor, SET Environmental, to respond once I evaluated the site. Also activated PWE for sand trucks, storm water inspectors and health and safety folks. Also had HAD HAZMAT come out and do air monitoring. I left the site at midnight with SET Environmental still on Kingsbury sucking up the last of the liquids. Do you need more than this? If so, will have to be tomorrow before I can get you something. Let me know.

Can you send me your timeline on the City Response to the CES Chemical Spill that you responded to on 8/1/14?

Thanks
